

Supplementary Figure S4. Prediction vs. observation of PK model. **(a)** PK profile on Cycle 1 Day 1 and **(b)** PK profile on Cycle 1 Day 15.

Solid lines represent observed results (including observations after dose interruption/reduction). Dashed lines represent the median and the gray shaded area represent 5th and 95th percentile of 1000 simulations with continuous dosing.

BID, twice daily; PK, pharmacokinetic; QD, once daily.
